

**Notes: T1-10 Basics of Geometry**

| Geometric Figure   | What does it look like? | How do you write it? | Real World Examples |
|--------------------|-------------------------|----------------------|---------------------|
| point              |                         |                      |                     |
| collinear points   |                         |                      |                     |
| line               |                         |                      |                     |
| plane              |                         |                      |                     |
| coplanar points    |                         |                      |                     |
| line segment       |                         |                      |                     |
| ray                |                         |                      |                     |
| angle              |                         |                      |                     |
| congruent segments |                         |                      |                     |
| midpoint           |                         |                      |                     |
| congruent angles   |                         |                      |                     |
| angle bisector     |                         |                      |                     |
